- The Period for Rep	MAILING DATE of this comi	nunication appea	ars on the cov	er sheet with the c	orrespondence ad	dress		
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

- 1. Applicant's preliminary amendment filed 1/20/04 has been entered as paper number 10. The examiner acknowledges that claims 112-115 were inadvertently withdrawn from consideration in the rejection of 10/3/02 (paper number 5). Claims 1-45, 74-104,112-115 are now pending.
- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 4. Claims 1-45,74-104,112-115 are rejected under 35 U.S.C. 103(a) as being unpatentable over Choki et al 5,356,717.

Choki discloses as seen in figures 6 and the related specification in column 4 lines 29+, a card having a substrate 21, a magnetic storage layer 31 and a protective layer(s) 32/33. The protective layer consists of hiding layer 32 with magnetic properties

and a coating layer 33. There is an intermediate design layer 41 between the magnetic layer 31 and the top protective layer 33. It is disclosed that the layer is between 0.01-10 micrometers. Choki does not specifically disclose the relative motion of the scanning of the magnetic layer. However, if not inherent, it is old and well known to move a magnetic layer relative to a magnetic read head in reading of the magnetic information. It would have been obvious to one of ordinary skill in the art at the time of the invention to move the magnetic card passed a read head in order to allow the magnetic card of Choki to be read in a conventional and existing magnetic card reader. Choki does not disclose that the data storage device is generally circular in shape. However, this is a matter of design choice as circular codes are old and well known. It would have been obvious to one of ordinary skill in the art at the time of the invention to use a generally circular substrate shape in order to allow the card of Choki to be read by a means with also a generally circular reading capability, for example, a disk drive in a PC.
